

ESP-400 Series Mechanical Convection Ovens

ESP-400 Series Mechanical Convection Ovens

The Blue M ESP-400 Mechanical Convection Horizontal Air flow Oven provides reliable performance, making it ideal for constant temperature work and for applications where fast run-up and cool-down rates are required.

A one-pass air flow system allows incoming air to pass over the heaters and through the work chamber only once, if desired, enabling fast cool down or quickly venting non-hazardous fumes or moisture. The horizontal air flow offers excellent temperature uniformity.

The setpoint and process variables appear on a bright, easy-to-read LED display. Setpoints are adjustable to 1°C resolution.

The main control regulates temperature by switching heater power through a solid state relay circuit.

An FM-approved independent over-temperature protection system is provided. This control disconnects heater and motor power and alarms an audible buzzer until manually reset by the user.

Oven Features

- All-welded, heavy-duty exterior heavy-gauge, reinforced cold-rolled steel
- Stainless steel interior corrosion resistant, including inner face of door
- Adjustable shelves nickel-plated wire type with 7 shelf positions
- Baked-on powder-coated enamel finish for long-lasting corrosion protection
- Fiberglass insulation to ensure moderate cabinet skin temperature
- Heavy-duty door double-wall, insulated construction

Uniform, Accurate and Reliable Temperature Control

- Available with profiling or single setpoint temperature controls
- Adjustable one-pass air flow system tempered air passes over heater and through chamber only once if necessary - readily adjusted to suit a broad range of product loads and operating requirements
- Air circulation quality ball bearing motor and balanced multi-blade blower
- Exclusive Blue M Eterna™ heating elements with nichrome and ceramic heater bank provides quick response low-watt density assures long life
